

AI-Powered Event Summarization

Across 50,000+ Wall Street Events Per Year

Watch The Video

Aiera, the leading live speech-to-text and search platform for Wall Street events, now offers Automated Event Summaries of all financial events including earnings calls, conference presentations, investor meetings, and more. Users can now view quick and digestible explanations of the most pertinent details from any event, increasing discoverability and boosting the productive consumption of management commentary on the Aiera platform.

➤ **12,000+**
Equities Under Coverage

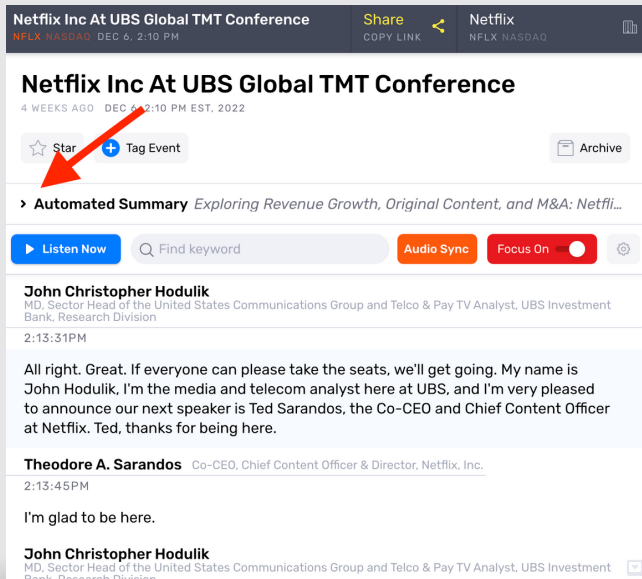

➤ **50,000+**
Events Covered Per Year

HOW IT WORKS | Cliff Notes-Style Event Summaries

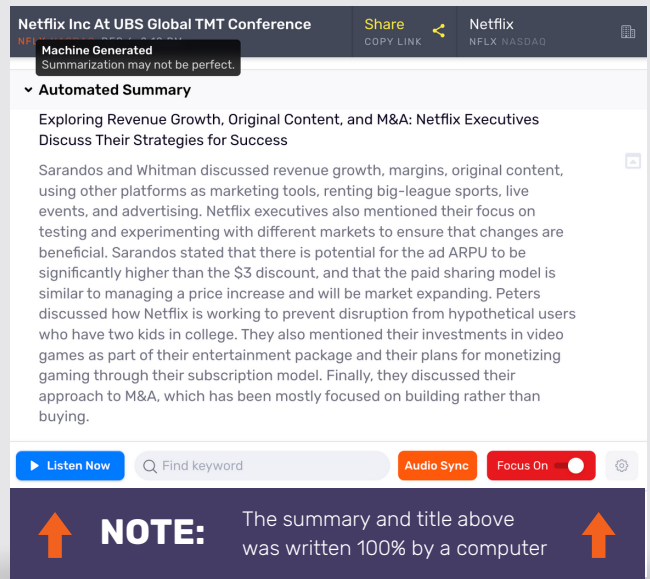

Available via:

1 Open an Event & Click "Automated Summary"

2 View the Summary, Play It Back, and Dig In

Aiera Does *Not* Leverage ChatGPT

While there has been much talk about ChatGPT in the press, it is worth noting that this new summarization from Aiera does NOT leverage ChatGPT.

Aiera's Specialized Approach

Instead, our approach involves proprietary extractive & abstractive modeling, our global breadth of coverage, and growing event history.

The Finance-Oriented Result

The result is a short summary that captures the key details from an event that may have included 10+ pages of text, in just a few paragraphs.

Added Benefits & Use Cases of Aiera's Automated Event Summarization

Emailed Summaries

Get summaries across your Watchlist sent to your inbox
