Investment Philosophy and Objective

The fundamental investment objective of this Fund is to provide long term capital appreciation by investing, directly or indirectly, in precious metals on global basis. This Fund invests on a global basis primarily in common shares of companies engaged in the precious metals business. Precious metals are gold, silver, platinum and palladium. The Fund also invests in precious metals in the form of bullion, coins or storage receipts primarily as a way to maintain liquidity while continuing to be invested in precious metals. Generally, when Goodman believes that the price of precious metals or common shares will fall, the Fund's portfolio will be more heavily weighted in favour of bullion, coins and storage receipts, and vice versa.
