

Drill Collar Plan And Cross Sections To Accompany
Aftermath Silver Berenguela Drill Results News Release
June 06, 2022

Refer to QP & QA/QC Statement in the NR

Berenguela Project Location

June 06,2022 DRILL RESULTS

Historical Results

Historical drill intercepts shown on the sections in this presentation for BER RC holes drilled on the Berenguela project were taken from the 2021 NI 43-101

Technical Report on the Berenguela property titled “Berenguela Silver-Copper-Manganese Property Update” filed on SEDAR on February 25, 2021, authored by independent QP’s J.M. Shannon P.Geo, M.A. Batelochi MAusIMM (CP), and G.S. Lane FAusIMM, and has an effective date of February 18, 2021, filed on the Aftermath Silver SEDAR profile.

The reader is cautioned that these are historical drill intercepts and as such cannot be relied upon, although Aftermath believes the historical work to have been completed to a high standard. Aftermath is currently drilling at Berenguela to verify a selection of the historic drill holes completed at Berenguela.

**Reported intersection widths are shorter than total widths drilled where voids due to historic underground mining activity were encountered during drilling. Voids were measured and discounted from the intersection width with no dilution of the reported grades. Berenguela mining: from 1913 until 1965 approximately 500,000 tons was mined from 17,700m of underground workings and open pit operations – this equates to roughly 1.1% of the historic Berenguela resources (see p.12 of AAG’s corporate presentation for details: <https://aftermathsilver.com/site/assets/files/5753/2022-04-19-cp-aag.pdf>). Aftermath recently obtained complete plans of underground workings which will be incorporated into resource modelling where practical and appropriate. All open pits have been surveyed in detail.*

² The drilling was carried out at a high angle to the stratigraphically controlled mineralisation and intersections can be assumed to equate approximately to true thickness apart from where local folding is encountered in the upper part of AFD-029.
